European Federation of IASP Chapters

www.efic.org

**To all EFIC Councillors,
To all Presidents of IASP® Chapters within EFIC**

Vilvoorde, 12 October 2007

Dear Friends,

The start of the **European Week against Pain in Women** is rapidly approaching! As you all know, this will only be the beginning of a whole exciting year devoted to this theme, internationally.

We are finalising the EFIC website related to this event, to appear in the next few days. With this respect Dr. Giamberardino would like to ask you about any event/congress that your chapter is organizing in your country, not only during next week, but any time during the forthcoming year: there will be a specific area of the website for listing all European events. If you want your initiatives to be advertised there, please be so kind as to send us a few lines on this issue (title of the event, site, date and organizer and any other info that you deem important/necessary).

We also take this opportunity to thank those of you who have sent their reports to Dr. Giamberardino on the national "state of the art" about pain diagnosis and treatment in women in their country. These already available reports will appear on the website in the next few days. We are looking forward to receive the reports from the other chapters; please be so kind as to send these to Dr. Giamberardino at: mag@unich.it. After editing they will be inserted in the website as they arrive.

.../2

EFIC is also preparing slide material to be available for downloading from the website, for use during any national event organized in your countries during the forthcoming global year against pain in women. You will soon find this material in a special section of the website.

For any information you may require, please do not hesitate to contact Dr. Giamberardino at any time.

We look forward to hearing from you.

Best regards,

Prof. M. A. Giamberardino
EWAP Coordinator
Pain in Women

Prof. Serdar Erdine
